

LIQUID GAS WEEK

22-26 SEPTEMBER 2025 • RIO DE JANEIRO

Delivering Energy for Life

Liquid Gas Week

The Global Liquid Gas Community in Action

Liquid Gas Week stands as the foremost global gathering for industry professionals, offering unparalleled opportunities for learning, networking, fostering innovation and expanding business ventures.

Liquid Gas Week is the World Liquid Gas Association's annual flagship event that travels the globe. It is the unique annual gathering of CEOs of major LPG companies, government ministers, representatives of intergovernmental organisations and media.

The event brings together the entire Liquid Gas value chain through dedicated conference sessions, interactive meetings and workshops, business and networking opportunities, and a prominent international exhibition.

This year's event will host the Latin America Day. A full day to discuss with authorities, specialists, entrepreneurs, and policymakers the opportunities and challenges in the Latin American LPG sector, offering a unique chance for industry professionals to engage with the regulatory agenda.

From LPG Week to Liquid Gas Week

The change from LPG Week to Liquid Gas Week reflects an expanded focus within the industry. While LPG Week primarily concentrated on Liquefied Petroleum Gas (LPG), the rebranding to Liquid Gas Week encompasses a broader range of liquid gases, including but not limited to LPG.

This shift allows for a more inclusive representation of the liquid gas sector, addressing various types of liquid gases and their applications, innovations, and market developments. Liquid Gas week will attract a wider audience and foster greater collaboration and knowledge-sharing across the entire liquid gas industry.

The venue: EXPO MAG

Liquid Gas Week will be held at EXPO MAG, centrally located in Rio de Janeiro, and the winner of the Caio Prize for the best convention centre in Brazil.

The Event Theme

Delivering Energy for Life

The theme of this year's event 'Delivering Energy for Life' will underscore the transformative impact of Liquid Gas on people and communities across the world. As a clean, efficient, and accessible fuel, Liquid Gas, including LPG, plays a critical role in improving the daily life of billions of people from cooking and heating to powering vehicles and industries.

'Delivering Energy for Life', highlights the essential value of safe and reliable LPG delivery to every household around the world.

The Brazilian LPG Market

Brazil is the 7th largest consumer of residential LPG in the world and most of the LPG is consumed in the well-regulated domestic sector. The majority of the population has access to LPG and the country boasts a per capita consumption of nearly 34kg/year.

Its well-established LPG industry, with its robust production, supply, and distribution infrastructure, and Rio de Janeiro, being one of the major economic centers in Brazil, makes it the perfect destination for Liquid Gas Week 2025.

The Brazilian LPG Market in figures

Seventh consumer of residential LPG in the world

Over 7.4 million metric tonnes (mmt) of consumed LPG per year

750 LPG cylinders delivered every minute

Per capita consumption of nearly 34kg of LPG per year

Production of LPG supplies: 4.5mmt per year from refineries and 1.3 mmt per year from gas processing plants

Imports of LPG: 1.6 mmt per year

About the destination

Brazil is the largest country in South America and occupies half the continent's landmass. It is the fifth largest nation in the world. The country has borders with every South American country except Chile and Ecuador. The Northern part of Brazil is dominated by the Amazon River and the jungles that surround it.

Rio de Janeiro is renowned for its breathtaking natural landscapes. The iconic Christ the Redeemer statue elected one of the seven wonders of the world, Copacabana and Ipanema beaches and Sugar loaf mountain make Rio an attractive destination for international visitors.

About the World Liquid Gas Association

The World Liquid Gas Association is the authoritative voice for the global Liquid Gas industry, representing the full Liquid Gas value chain. The primary goal of the association is to add value to the sector by driving premium demand for Liquid Gas, while also promoting compliance to good business and safety practices.

With over 300 members in 125 countries, the association brings together private and public companies involved in one, several or all activities of the industry, develops long-term partnerships with international organisations, and implements projects on local and global scales.

For more information: www.worldliquidgas.org

The Ibero-American Liquefied Petroleum Gas Association (AIGLP) brings together more than 70 companies and associations from 16 countries. The Association is committed to promoting sustainable practices in the LPG sector and constantly seeking innovative solutions for a cleaner and more responsible future.

In 2025, the 38th AIGLP Congress will be held together with Liquid Gas Week, uniting two of the industry's leading events.
