INTERVIEW PIECE

MR. ROB DONALDSON
SENIOR VICE PRESIDENT
TARGA RESOURCES,
USA

Collaborating Sponsor of Liquid Gas Week 2025/Rio de Janeiro

Thank you for taking the time to talk to the Liquid Gas Week News. Could you tell us what made you decide to become a sponsor of this year's Liquid Gas Week 2025 in Rio de Janeiro?

Rob Donaldson: In fact, Targa Resources plans to sponsor Liquid Gas Week each year. The sponsorship is consistent with supporting the global industry as well as the WLGA's annual efforts. LPG offers tremendous opportunities for existing markets to improve safety, demonstrate reliability, and develop new technologies. In new and developing markets, LPG improves health and human wellbeing while displacing historic fuels with a cleaner, available, and lower carbon intense option.

There are opportunities for LPG in every market around the world and Targa supports the WLGA by sponsoring Liquid Gas Week in the hopes of furthering the global market for LPG and all Liquid Gas.

What are according to you the three main strengths of Liquid Gas Week?

Rob Donaldson: First of all, the event's global visibility. Targa is solely a US operator and not active as a distributor, yet one of the largest LPG exporters from the US. Since its first engagement with the WLGA, Targa has benefitted from the global views that the Liquid Gas Week provides.

Furthermore, the connection with the host markets. Each year, the WLGA does an excellent job of finding host locations to hold the event and provide direct engagement with local marketers and their activities. The last few years, with the event taking place in Cape Town (2024), Rome (2023), and India (2022), have demonstrated the strong connection with the host country/region.

And undoubtedly, the connection with industry leaders. Liquid Gas Week brings leaders to a gathering where meetings can be prearranged or ad hoc, providing good information exchange and relationship development.

INTERVIEW PIECE (CONTINUED)

What are your thoughts on the key opportunities for Liquid Gas, including LPG in Brazil (and beyond)?

Rob Donaldson: Liquid Gas has a great history and role in South and Latin America. The gathering in Rio de Janeiro will provide attendees with opportunities to hear more directly from regional players. This year will also continue the impressive work done in Cape Town last year to focus on Clean Cooking in Sub-Saharan Africa. Clean cooking opportunities will extend to improve the quality of life in other developing markets around the world as well.

What specific products or services will you highlight this year during Liquid Gas Week? Or anything else that you would like to share with the readers of Liquid Gas Week News?

Rob Donaldson: Targa Resources, as one of the largest LPG exporters in the US, will focus on continued robust growth in supply and infrastructure investment to connect US LPG production with global markets.

What message do you have for the attendees in Rio de Janeiro?

Rob Donaldson: Don't miss out! Liquid Gas Week has something for everyone. The exhibition hall will have the latest and greatest equipment and technical advances as well as any other needs for LPG. The sessions throughout the week cover all aspects of the industry from global dynamics to regional and local support and developments. I look forward to seeing you in Rio!
