INTERVIEW PIECE

MR. DARRYL ROGERS

VICE PRESIDENT, LPGS/NGLS – OIL, FUELS &
CHEMICALS RESEARCH & ANALYTICS
S&P GLOBAL COMMODITY INSIGHTS
USA

Contributing Sponsor of Liquid Gas Week 2025/Rio de Janeiro

Thank you for taking the time to talk to the Liquid Gas Week News. Could you tell us what made you decide to become a sponsor of this year's Liquid Gas Week 2025 in Rio de Janeiro?

Darryl Rogers: This year, we are a “Contributing sponsor” along with a significant investment in branding, you won’t be able to miss us 😊. The proposed options give us prime visibility and that is what we were looking for.

At S&P Global Commodity Insights – the trusted experts in all things LPGs and NGLs – we are there for the attendees at Liquid Gas Week. The attendees, leaders, and market participants deeply engaged in the LPG and liquid fuels industry are seeking WLGA’s insights on these markets to help drive informed decisions and strategic clarity. That’s what we do and why we attend and sponsor this industry leading annual event. We have actively participated and sponsored for years and see this as a great opportunity for our company and for those companies attending.

What are according to you the three main strengths of Liquid Gas Week?

Darryl Rogers: Engagement, collaboration, and a view of the changing landscape and how Liquid Gas market participants think about the short-term and the long-term through their annual plans and strategic plans.

What are your thoughts on the key opportunities for Liquid Gas, including LPG in Brazil (and beyond)?

Darryl Rogers: S&P Global combines the strengths of its Research & Analytics division and the Commodity Insights division, which includes Platts as a Price Reporting Agency (PRA). This synergy provides extensive market analysis, pricing information, and supply-demand forecasts crucial for the LPG and NGL markets in Brazil. The LPGs/NGLs team offers valuable insights into regional and global supply, demand, and price outlooks, supporting Brazil's strategic initiatives to diversify supply sources. Key opportunities for Liquid Gas, including LPG, in Brazil include growing demand, infrastructure development, and environmental benefits.

INTERVIEW PIECE (CONTINUED)

Beyond Brazil, Liquid Gas opportunities and decarbonisation efforts span from Africa, with its lower fossil fuel usage, to Europe, which is high on the fossil fuel ladder, highlighting the global potential for sustainable energy solutions. Our Commodity Insights experts in the Research & Analytics division are keen on engagement, collaboration, and providing sounding boards and expert views of the changing landscape, helping Liquid Gas market participants adapt to short-term and long-term factors that influence their annual and strategic plans.

What specific products or services will you highlight this year during Liquid Gas Week? Or anything else that you would like to share with the readers of Liquid Gas Week News?

Darryl Rogers: For Liquid Gas Week attendees in Rio, S&P Global Commodity Insights offers significant value through its two core strengths:

- Platts (Price Reporting Agency): Attendees gain access to trusted, transparent benchmark pricing and market assessments across commodities, helping them navigate volatile markets with confidence and make informed trading and investment decisions.
- Research & Analytics: The division provides deep, data-driven insights into market trends, supply-demand dynamics, and energy transition developments—empowering strategic planning and risk management through expert forecasts and scenario analysis.

What message do you have for the attendees in Rio de Janeiro?

Darryl Rogers: It's an honour to connect with such a dynamic group of leaders and changemakers that will gather in Rio. At S&P Global, we believe that transparent data, insightful analytics, and forward-looking perspectives are essential for shaping a more sustainable and resilient global economy. As we meet in this vibrant city – a symbol of both challenge and opportunity – we're reminded of the power of collaboration across borders and sectors. Let's use this moment to share ideas, spark innovation, and build lasting partnerships that drive progress for people, markets, and the planet.

Come meet us and the industry in Rio.
